

Campus IT Usage Policy

1. Network Access

Students may register up to 3 devices on the campus WiFi network.
Each device must be registered with a valid student ID number.
Unregistered devices will be blocked automatically after 15 minutes.
Guest accounts are valid for 24 hours and must be sponsored by a current staff member.

2. Remote Access

A VPN connection is required to access library databases and internal file servers from off campus.
The VPN client is available from the IT Services website.
Do not share VPN credentials with anyone, on or off campus.
VPN sessions are logged and inactive sessions are terminated after 8 hours.

3. Passwords

Passwords must be at least 12 characters and must be changed every 180 days.
Reusing any of the previous 5 passwords is not permitted.
Multi-factor authentication is required for administrative systems.

4. Acceptable Use

Campus network resources are provided for teaching, learning and research.
Peer-to-peer file sharing is prohibited on the campus network.
Running cryptocurrency mining software is strictly forbidden and will result in immediate disconnection.

5. Data and Storage

Each student is allocated 50 GB of cloud storage.
Data stored on university systems may be subject to disclosure under public records requests.
Students should not store sensitive personal data on shared drives.

6. Support

The IT Helpdesk is located on level 2 of the student centre.
It is open from 09:00 to 17:00 on weekdays and is closed on public holidays.
Urgent security incidents should be reported to security at any time.
